

SELFIE & ID DATASET GUIDE

"Greetings!

We are grateful for your interest and trust in TrainingData.pro, as you have downloaded our sample dataset.

I am Yura Mayer, the DataMarket project manager, and I would like to offer some insight into working with this folder and the data we provide to our customers.

File with the extension .csv

includes the following information for each media file:

- SetId: a unique identifier of a set of 15 media files,
- UserId: the identifier of the person who provided the media file,
- UserRace: the ethnicity of the person
- Country: the country of origin of the person,
- Age: the age of the person,
- Gender: the gender of the person,
- Name: the name of the person
- FName: the type of the media file
- URL: the URL to access the media file

The file can be easily opened using a browser, Excel, or programming languages.

Folder "samples" with media files

- containing all the photos
- which correspond to the data in the .csv file

How it works: go to the first folder and you will make sure that it contains media files taken by a person whose parameters are specified in the first 15 lines of the .csv file.

In order to get access to more than 65,000 media files from 4,340 people or to learn more about our data, please contact our sales team by submitting a request on our website or emailing us at sales@trainingdata.pro

Best regards,
TrainingData.pro
